## Letter of Interest

Lead UI Designer – Professional Technologist 4.73

I am writing to confirm my interest in the UI Designer position at the HSC. I am at a point in my career where I would like to take on new challenges and further my knowledge in my field and I think this position would allow me to do so. I enjoy UI design because it's where I start every project. I equate it to solving a puzzle where you make up the pieces as you go and the picture is what you make of it. Identifying the audience and creating a fluid, user-friendly experience that looks great. No matter what web project I'm designing, I always feel that that is the core of the process. I consider myself a problem solver and I like working with clients to understand the problems they face and devising creative ways to address them.

Up to this point I have not been able to work on SOLE or its apps personally but I've seen the leaps it's taken in interface design and would love to continue that. Furthermore I believe that learning to integrate programming and design is the present and future of this industry and I'd like the opportunity to develop my talents with our LMS.

Sincerely,

Tanner Yuhase
